-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 4, are rejected under 35 U.S.C. 102(b) as being anticipated by DE 19733941.

DE 19733941 discloses a pipe for a turbine comprising elbows 1 and 5 having rigid portion with centerline curving in three dimension (note figure 2).

Claims 1, 4, are further rejected under 35 U.S.C. 102(b) as being anticipated by US 6179342 (Shen).

Shen discloses a pipe for a turbine comprising elbows 24 having rigid portion with centerline curving in three dimension.

Claims 1, 4, are further rejected under 35 U.S.C. 102(b) as being anticipated by US 5054819 (Grunwald).

Grunwald discloses a pipe for a turbine comprising elbow 20 having rigid portion with centerline curving in three dimension.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and

the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 2-3 are rejected under 35 U.S.C. § 103(a) as being unpatentable over DE 19733941 in view of U.S. 5255507 (Gounder). DE 19733941 discloses all the claimed subject matter as set forth above, but does not disclose a condenser and a boiler. Gounder is relied upon to disclose it's well known to connect a steam turbine with a condenser 44 and a boiler 32. It would have been obvious at the time the invention was made to a person having ordinary skill in the art to connect the turbine in DE 19733941 with a boiler and a condenser as taught by Gounder for the purpose of forming a steam turbine cycle to produce works.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Hanlow, Wise, Norton, Reed, all disclose rigid pipes having elbows curving in three dimensions.
